

# Module temperature sensor

## 3S-MT-18B20

We supply economical module temperature sensors for universal application as well as for solar photovoltaics plants. Many different industrial output signals are available.

### TECHNICAL DATA

#### General Information

Sensor type	DS18B20 digital temperature probe for flat surfaces
Temperature range	-30...+80°C Accuracy: $\pm 0.5$ °C
Sensor housing	Flat tube or IP65 plastic housing with aluminum plate (40x40x12mm)
Cable	3 m or 5 m UV-resistant PUR cable
Connection	One-Wire-Bus technique
